

Muhammad Uzair (AI Engineer)

✉ uzairofficial06@gmail.com ☎ +92 3465613309 📍 Peshawar, Pakistan 🔗 LinkedIn 🐙 Github

PROFILE

Computer Science graduate with hands-on experience in Python, NLP, Machine, deep learning and deploy LLM. Skilled in developing intelligent systems to solve practical problems.

SKILLS

- **Machine Learning:** Supervised & Unsupervised Learning, Classification, Regression, Data Handling, Feature Engineering, Data Preprocessing, Model Evaluation & Optimization.
- **Deep Learning:** ANN, RNN, LSTM, GRU, Encoder-Decoder.
- **Agentic AI & LLM Application Stack:** LangChain, RAG, FastAPI, Vector Databases (FAISS), GPT (OpenAI), Hugging Face, Embeddings, Transformers, Fine-tuning.

PROFESSIONAL EXPERIENCE

Research Assistant, (SmartLab-ICUP)

Aug 2024 – May 2025 | Peshawar, PK

- Publishing Research Paper of *Urdu Sentiment Analysis Using Deep Learning and Transformer-Based Models*.
- Built and fine-tuned transformer models (BERT, GPT, T5) for Urdu Sentiment Analysis and RAG-based systems for QA and MCQS generation.
- Applied deep learning with RNN, LSTM, and GRU models using TensorFlow and scikit-learn for NLP solutions.

AI Intern, (Greesoft Pvt)

Jun 2025 ongoing | Peshawar, PK

- Developed interactive Streamlit dashboards for classification and regression model deployment.
- Executed comprehensive data collection, preprocessing, and cleaning Techniques.
- Worked on Sentiment Analysis and price prediction problems.
- Built a Small chatbot for School App for FAQ's.
- Liver Disease detection using YOLO models.
- AI Resume Analyzer.

PROJECTS

Title: *Urdu Sentiment Analysis Using Deep Learning and Transformer-Based Models*

Tech:

Python, TensorFlow, Keras, Word2Vec, FastText, Glove, Transformer Models (ALBERT, RoBERTa, Facebook bart based, GPT2, T5).

Key Contributions:

Designed and trained multiple deep learning models (RNN, LSTM, GRU, Bi-LSTM) and fine-tuned transformer-based models to build an accurate Urdu Sentiment Analysis system, achieving over 91% accuracy and contributing to the creation of the URDU Tweets dataset.

Title: *Agentic AI-Based Physics Educational Chatbot*

Tech:

Python, Groq, Gemini, Flask.

Key Contributions:

Develop a chatbot that student upload there own pdf and from that certain pdf Automatic Mcqs will be generated as well as there number of mcqs, Levels (simple, medium, Hard) and along with a little bit of explanation.

Education

BS Computer Science (Islamia College and University Peshawar)

Jul 2021 – 25 | Peshawar, KPK

- **CGPA:** 3.23
- **Relevant Coursework:** DSA, OOP, Analysis of Algorithm, Artificial Intelligence, Internet Programming, Java, C++, Digital Image Processing.
